Pediatric Subspecialty Update

Saturday, October 4, 2008

COURSE DIRECTOR:
Karen Judy, M.D.

Sponsored by:
Loyola University Chicago
Stritch School of Medicine
Department of Pediatrics and the
Division of Continuing Medical Education

Ronald McDonald® Children's Hospital of Loyola University Medical Center is a 100-bed hospital-within-a-hospital. It has been recognized by the National Association of Children's Hospitals and Related Institutions for its breadth of pediatric services and child health experts. Ronald McDonald® Children's Hospital (RMCH) has one of the region's largest pediatric burn centers, a comprehensive pediatric emergency room and pediatric trauma programs, a state-of-the-art pediatric intensive care unit, a nationally recognized pediatric program and an accredited Cystic Fibrosis Center. For childhood cancers, hope blossoms under the experienced eyes of Loyola's hematologist/oncologists who work in partnership with Loyola's acclaimed Cardinal Bernardin Cancer Center. RMCH is home to Illinois' largest neonatal intensive care unit (50 beds) and consistently achieves the state's best survival rates for low-birthweight babies. It is one of the top three programs in the United States and the only hospital to have a fully integrated home health program.

LOYOLA UNIVERSITY CHICAGO STRITCH SCHOOL OF MEDICINE FACULTY

ANDREW BONWIT, MD, FAAP
Assistant Professor
Department of Pediatrics

AFSOON KARIMI, MD, FAAP
Assistant Professor
Department of Pediatrics

ANNICK GAYE, MD, FAAP

Pediatric Subspecialty Update
Saturday, October 4, 2008

CURRICULAR GOALS AND OBJECTIVES

Educate participants on ITP

Upon completion of this activity, participants will be able to:

- Recognize the acute and chronic forms of ITP
- Re-assess treatment options including new treatments for chronic ITP

Educate participants on common food allergies

Upon completion of this activity, participants will be able to:

- Recognize risk factors of common food allergies
- Counsel patients on avoidance and treatment of common food allergies

Educate participants on type 1 diabetes management

Upon completion of this activity, participants will be able to:

- Describe the functioning of insulin pumps and be able to make basic changes to pumps

Discuss diagnosis, infection control and MRSA treatment

Upon completion of this activity, participants will be able to:

- Differentiate MRSA colonization from infection
- Understand the pros and cons of treating MRSA colonization
- Describe the appropriate antibiotic treatment for MRSA infection

Discuss nonepileptic paroxysmal disorders in childhood

Upon completion of this activity, participants will be able to:

- Recognize that many paroxysmal disorders are nonepileptic and often need to be distinguished from epilepsy

Identification of child abuse

Upon completion of this activity, participants will be able to:

- Recognize physical signs of child abuse
