

## EVALUATION AND GRADING

You will receive a Final Grade for the Wards Subinternship. Your grade will be based on the following components:

1. A multiple-choice quiz covering the Pain Management curriculum content
2. A clinical performance evaluation, completed by your attending(s) and resident(s) at the end of the rotation (see below).
3. Standardized exercises in the Clinical Skills Center on the last day of the rotation.
4. Directly observed experiences (handoff and calling a consult) as evaluated by your attending or resident(s)

The mid rotation feedback form and patient data log are not graded but you are required to turn these forms in before the end of the rotation.

Your evaluators have been notified to meet with you at the end of each rotation to review their evaluations with you, but it is your responsibility to set up a time to meet with them. After meeting with them at the end of the month, you should collect your evaluation and turn the evaluation in to the Medical Education Office.

To achieve a Final Grade of PASS, you must meet or exceed the Minimum Passing Score on each of these components. The Subinternship Course Director determines minimum Passing Scores, as well as cut-off scores for HIGH PASS and HONORS.

Minimum Passing Scores and intended weights for each component are given below:

	<u>Minimum Passing</u>	<u>Weight</u>
Online Quiz (Pain Mgmt)	60%	10%
Clinical Performance Evaluation	60%	60%
Clinical Skills Exercise (Handoff)	60%	10%
Clinical Skills Exercise (Error Disclosure)	60%	10%
Directly Observed Exp (Consult)	60%	5%
Directly Observed Exp (Handoff)	60%	5%

A Final Grade of FAIL will be given to students whose scores on one or more of these evaluation components do not meet or exceed the minimum passing scores. If you do not receive a passing score on the written examination, you will be notified as soon as possible thereafter. If you do not receive a passing score on the written examination or clinical performance evaluation you will be notified that you must meet with the Course Director to develop a satisfactory remediation plan.
