

ASSESSMENT AND EVALUATIONS

TEST/GRADES

The final course grade will come from the test scores, as well as participation in small group discussions and laboratory sessions.

GRADES:

Your final course grade will be calculated based on the following formula:

Total Number of Exam Questions Answered Correctly/Total Number Exam Questions

<u>Exam</u>	<u>% of Final Grade</u>
Multiple Choice Exams	85%
End of Semester Exam (comprehensive exam covering all lecture material from the semester + laboratory exam)	<u>15%</u>
Total	100 %

Grades are assigned according to the following ranges:

HONORS:	≥ 91.5
HIGH PASS:	$\geq 84.5 - 91.5$
PASS:	70 – 84.5
FAIL:	Less than 70

GRADING OF SMALL GROUP AND LABORATORY SESSIONS

Small Group Sessions

Attendance at each small group session is a course requirement.

Each student is responsible for signing the designated attendance sheet for each session.

If a student cannot attend a scheduled session, it is professional courtesy that they inform their small group facilitator. This does not automatically “excuse” the absence.

If a student has more than **2** unexcused small group absences during a semester, a point will be deducted from the Final Course Grade for each absence and a “Concern” will be noted within the “Professionalism” Competency Assessment.

Facilitators in the small groups will note **satisfactory preparation and participation** for the small group discussions. Failure to initiate comments or answers throughout a session, repeated inability to answer questions, and lack of preparedness for a session are unacceptable. Faculty will complete the Small Group Sessions Competency Assessment and note whether a student “Meets Expectations”, “Meets Expectations with Concerns”, or “Does Not Meet Expectations”.

A student must meet expectations for each assessed competency in order to pass the course.

Laboratory Sessions

Attendance at each laboratory session is a course requirement.

Each student is responsible for signing the designated attendance sheet for each lab session.

If a student has more than **1** unexcused laboratory session absence during a semester, a point will be deducted from the Final Course Grade for each absence and a “Concern” will be noted within the “Professionalism” Competency Assessment.

Attendance at the virtual microscopy review sessions is highly encouraged, but attendance will not be taken. Students should take the opportunity to attend the sessions to review laboratory content and engage the assistance of the Pathology faculty and resident facilitators for any questions.
