

# EVIDENCE-BASED MEDICINE PROJECT OUTLINE

1. **Background:** Your patient's history, physical exam, and issues.
2. **Question/Type:** State the clinically relevant question, and indicate the type of question addressed by the article (therapy, diagnosis, prognosis, etc.)
3. **Literature Search:**  
(Attach a copy of your article – **do not use an Internet printout unless it clearly shows all tables and figures**)
4. **REMINDER:**  
Complete the Library Module for the Evidence-Based Medicine Project
5. **Study Validity/Results:** From the "User's Guides," apply the appropriate one to briefly critique the article.
6. **Conclusion:** How has your question been answered, if not, why not?
7. **Communication:** How will you communicate study results to your patient and confirm their understanding?

**Turn in your EBM project at the final exam**
