

## Requirements

- Independently, but with proper supervision, provide care for assigned patients, including all record keeping, interacting with families and other health care personnel, performing appropriate procedures, participating in rounds, taking assigned call and participating in patient handoff
- Complete your SMART goal by the end of the first week
- Obtain verbal and written feedback on performance from attendings midway through the rotation. A Mid-rotation Feedback form will be provided (and also available on this website) which must be signed by the student and the attending and submitted along with the student's End-of-rotation clinical performance evaluation form. (Only the latter form will be used to determine the student's Final Grade.)
- Record and enter online "patient data log" which should be verified and signed by the resident or attending. This is due by the end of the third week of the rotation.
- Prepare for, attend, and participate in all structured subinternship activities, OSCE station exercises and final examination
